Vyrábíme produkty z přírody s láskou

BiOBUDi věří, že je možné si hrát a bavit se, aniž bychom poškozovali přírodu. To je důvod, proč vyrábíme stavebnici pro děti, která je šetrná k životnímu prostředí.

Planeta Země

Všichni mají právo na produkty, které jsou bezpečné pro jejich zdraví, ale také pro přírodu, ve které žijí. Dříve, než se dozvíte více o BiOBUDDi, pojďme si říct pár důležitých věcí o naší planetě.

Globální oteplování

O globálním oteplování jste již pravděpodobně slyšeli. Děje se proto, že v dnešní době využíváme energii téměř ke všemu, co děláme. Produkce této energie uvolňuje do vzduchu oxid uhličitý. Ten přispívá ke skleníkovému efektu, který způsobuje globální oteplování.

Přítomnost

Budoucnost

Naším cílem je přispět k tomu, aby se tento cyklus, poškozující planetu, zastavil. Mějme pozitivní vliv na planetu.

Jak se vyrábí?

Cukrová třtina v procesu růstu absorbuje oxid uhličitý. Tím redukuje jeho velké množství v atmosféře.

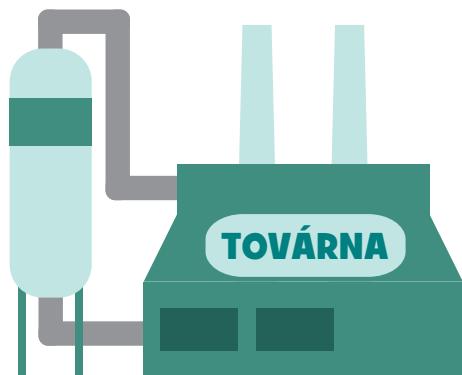

Cukrová třtina je pěstována pro výrobu potravin, oblečení a léků, při které se zpracovává jen její určitá část.

Při každodenních činnostech se do vzduchu uvolňuje oxid uhličitý.

Zbytky cukrové třtiny jsou použity jako surovina, která se transformuje na ethanol.

Tento ethanol se následně používá k výrobě tzv. BIO polyethylenu.

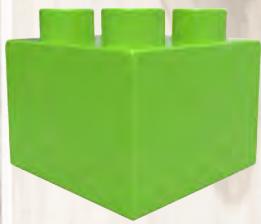

BIO polyethylen se následně používá k výrobě BiOBUDDI stavebnice v Holandsku.

Výsledný produkt je recyklovatelný a materiál lze znova použít na výrobu nového produktu.

PŘÍKLAD

Mějme pozitivní vliv na planetu!

Cílem BiOBUDDi je vytvářet lepší budoucnost.

BiOBUDDi je nová značka stavebnice, která je šetrná k přírodě, neboť je vyrobena z BIO materiálu.

Státní orgány stále více varují před používáním hraček, které nesplňují požadavky bezpečnosti. Dochází k přísnějším kontrolám a větší četnosti stahování závadných hraček z prodeje.

Navíc se podle průzkumů zvyšuje mezi rodiči zájem o ekologicky šetrné a bezpečné hračky. Aprávě proto jsou nové BIO kostky vyráběny z vedlejších produktů rostlin, nikoli z ropy. Z BIO materiálu je rovněž vyroben obal, nálepky, návody i použité lepidlo.

Nové BIO kostky jsou vyráběny v Holandsku.

**"Potřebujeme podstatně nový způsob myšlení,
jestliže má lidstvo přežít."**

-Albert Einstein-
(1879-1955)
